FITS 200 SERIES SPEED-LOC™

- Designed to work with the **300-ATM-1035** of the 300 Series Seed Boot System on pages 64-65.
- 3/4" weld-on tip with extra carbide for long-lasting wear life.
- Vertical approach reduces rock pulling.

200-KNF-0813

FITS 200 SERIES SPEED-LOC™

- This opener is used in conjunction with the Technotill system.
- The high-chrome tip with a carbide insert provides additional wear life.

200-KNF-7501

FITS 200 SERIES SPEED-LOC™

- Precise seed placement due to the funnel being close to the tip and to the bottom of the furrow.
- Reinforced funnel with hard surfacing for longer wear life.
- Funnel fits Bourgault and Flexi-Coil square tube seed boots.
- 3/4" weld-on tip, available with carbide (**200-KNF-7511**) or without carbide (**200-KNF-7510**).

*The carbide opener is also available with a phosphorous tube add-on, **200-ASY-7511P**.*

- Works with the 300 Series square tube seed boot. See page 65 for more details.
- Also fits Bourgault or Flexi-Coil square tube seed boot.
