THESE SIDE BAND OPENERS FIT: SEED HAWK INC.*

Seed Placement: The seed is placed in a 3/4" (19 mm) band onto a firm, unfractured seedbed.

Fertilizer Placement: Fertilizer is delivered in a band off to the side (right or left) on the same level as the seed. In less than ideal conditions, mixing between seed and fertilizer may occur. *For more information please refer to precautions & risk factors on page 22-23.*

Disturbance: Unique design of the tip provides low disturbance, low draft and smoother fields.

Replaceable Tips: Cast chrome tip with carbide inserts on the nose of the tip and the wing for excellent penetration and wear resistance. Narrow carbide cutting edge on the wing for exceptional penetration. *Assemblies on this page include the tip.*

Packer Recommendations: 2-1/4" (57mm) or wider.

Opener Features: Hard facing is placed on critical wear points to ensure a long-lasting holder and proper seed placement. The streamlined holder design reduces plugging and allows for better trash clearance.

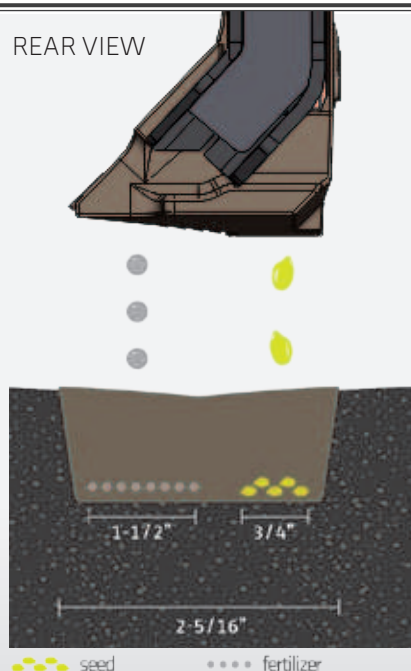

Installation Note: *When installing you must remove both the seed and fertilizer shanks and install the opener on the front mount (fertilizer shank).*

ALL WINGS ON SIDE BAND OPENERS MUST BE POINTING INWARD TO THE CENTER OF THE SEEDING UNIT TO PREVENT PLUGGING WHEN TURNING. CUSTOMERS SHOULD ORDER HALF LEFT AND HALF RIGHT WING OPENERS.

For a more detailed view of these openers see page 119.
